

PRITIKA DAS

pritikadas48@gmail.com | linkedin.com/in/pritikadas08 | github.com/daspritika08 | New Delhi, India

PROFESSIONAL SUMMARY

Second-year B.Tech–M.Tech Dual Degree student in CSE with Cybersecurity specialisation at National Forensic Science University, New Delhi. Full-stack developer and cybersecurity enthusiast with hands-on experience building AI-powered applications on AWS, REST APIs, and data-driven web projects. Proven in hackathons, CTF competitions, and professional roles.

EDUCATION

B.Tech – M.Tech (Dual Degree) | Computer Science & Engineering – Cybersecurity 2025 – 2030

National Forensic Science University, New Delhi | Currently in Second Year

TECHNICAL SKILLS

Languages: C, C++, Python, Java, JavaScript (ES6+)

DSA: Arrays, Strings, HashMaps, Recursion, Sorting & Searching, Trees, Graphs, Time & Space Complexity

Frontend: HTML5, CSS3, React.js, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, Formsprees API

Cloud & Tools: AWS (Bedrock, S3, OpenSearch), GitHub Copilot, Git & GitHub, VS Code, Linux

Data: SQL, NumPy, Pandas, Matplotlib, Seaborn

AI & ML: Machine Learning Basics, Deep Learning Fundamentals, Generative AI, RAG Architecture

Cybersecurity: IAM, Networking, Application Testing (Manual & Automated), CTF

EXPERIENCE

Full Stack Developer

ShadoFox | Remote

- Built and maintained full-stack MERN applications handling frontend UI and backend REST APIs.
- Collaborated with design and engineering teams to deliver end-to-end features on production deployments.

Cybersecurity – Identity & Access Management (IAM)

Cybersecurity Consulting Team

- Gained hands-on expertise in IAM principles, access control policies, and privilege management.
- Assisted in assessing and hardening identity infrastructure for client environments.

PROJECTS

SevaSetu – AI-Powered Citizen Services Platform

Generative AI | RAG | Amazon Bedrock | AWS S3 | OpenSearch Serverless

- Built a RAG-based system using Amazon Bedrock Knowledge Bases, AWS S3, Titan Text Embeddings v2, and OpenSearch Serverless to bridge information gaps in government schemes.
- Advanced to second round of AI for Bharat Hackathon (AWS) with high-accuracy retrieval pipeline.

Employee Product Dashboard

React.js | Redux | Node.js | Express.js | MongoDB | Chart.js

- Developed a role-based employee dashboard for tracking product performance metrics, tasks, and KPIs with dynamic Chart.js visualisations.
- Implemented React.js and Redux for state management, RESTful APIs with Node.js/Express for data operations, and MongoDB for persistent storage.
- Designed responsive, reusable UI components with authentication-based access control for admin and employee views.

Finance Dashboard

HTML5 | CSS3 | JavaScript (ES6) | Chart.js | GitHub Pages

- Responsive finance dashboard with Chart.js visualisations, dark-mode toggle (CSS variables), and LocalStorage persistence; deployed on GitHub Pages.

MERN + React Thumbnail Generator Website

React.js | Node.js | Express.js | MongoDB

- Full-stack MERN application for generating and managing custom thumbnails with RESTful APIs and responsive React frontend.

AI Resume Analyzer

React.js | React Router | Tailwind CSS | Puter.js

- Built an AI-powered resume analysis web app using React.js and React Router for client-side routing, styled with Tailwind CSS for a responsive UI.
- Integrated Puter.js for serverless AI inference and storage, enabling resume parsing, scoring, and feedback without a dedicated backend.

ACHIEVEMENTS

- AI for Bharat Hackathon (AWS) – Advanced to Second Round (Prototype Stage) with SevaSetu platform.
- CTF Player – Active participant in Capture The Flag cybersecurity competitions.
